

# ENRICHMENT

## Rabbits and small animals

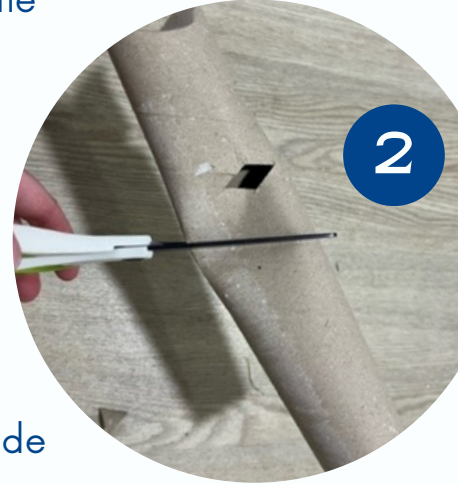

### STEP 1

Fold over the opening at one end of a cardboard tube.

### STEP 2

Cut triangles out of the edge of the tube all the way along. You can make it easier by making these holes bigger and having more of them or, to make it a bit trickier, you could just do a few smaller holes.

### STEP 3

Carefully poke two holes either side of the tube at the open end.

### STEP 4

Thread some string through these holes - this is how it will be attached to the animals' cage.

### STEP 5

Fill the tube with hay. You can also sprinkle some food pellets in the tube too and get some fresh veggies to poke out of the holes.

### STEP 6

Hang it up in their enclosure!
